

Bureau of Land Management, Interior

§ 1610.7-2

authorized by the Federal Coal Leasing Amendments Act, consists of an environmental assessment or impact statement, public participation as required by § 1610.2 of this title, the consultation and consistency determinations required by § 1610.3 of this title, the protest procedure prescribed by § 1610.5-2 of this title and a decision on the coal lease proposal. A land use analysis meets the planning requirements of section 202 of the Federal Land Policy and Management Act. The decision to approve the land use analysis and to lease coal is made by the Departmental official who has been delegated the authority to issue coal leases.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

§ 1610.6 Management decision review by Congress.

The Federal Land Policy and Management Act requires that any Bureau of Land Management management decision or action pursuant to a management decision which totally eliminates one or more principal or major uses for 2 or more years with respect to a tract of 100,000 acres or more, shall be reported by the Secretary to Congress before it can be implemented. This report shall not be required prior to approval of a resource management plan which, if fully or partially implemented, would result in such an elimination. The required report shall be submitted as the first action step in implementing that portion of a resource management plan which would require elimination of such a use.

§ 1610.7 Designation of areas.

§ 1610.7-1 Designation of areas unsuitable for surface mining.

(a)(1) The planning process is the chief process by which public land is reviewed to assess whether there are areas unsuitable for all or certain types of surface coal mining operations under section 522(b) of the Surface Mining Control and Reclamation Act. The unsuitability criteria to be applied during the planning process are found in § 3461.1 of this title.

(2) When petitions to designate land unsuitable under section 522(c) of the Surface Mining Control and Reclamation

Act are referred to the Bureau of Land Management for comment, the resource management plan, or plan amendment if available, shall be the basis for review.

(3) After a resource management plan or plan amendment is approved in which lands are assessed as unsuitable, the Field Manager shall take all necessary steps to implement the results of the unsuitability review as it applies to all or certain types of coal mining.

(b)(1) The resource management planning process is the chief process by which public lands are reviewed for designation as unsuitable for entry or leasing for mining operations for minerals and materials other than coal under section 601 of the Surface Mining Control and Reclamation Act.

(2) When petitions to designate lands unsuitable under section 601 of the Surface Mining Control and Reclamation Act are received by the Bureau of Land Management, the resource management plan, if available, shall be the basis for determinations for designation.

(3) After a resource management plan or plan amendment in which lands are designated unsuitable is approved, the Field Manager shall take all necessary steps to implement the results of the unsuitability review as it applies to minerals or materials other than coal.

[48 FR 20368, May 5, 1983, as amended at 70 FR 14567, Mar. 23, 2005]

§ 1610.7-2 Designation of areas of critical environmental concern.

Areas having potential for Areas of Critical Environmental Concern (ACEC) designation and protection management shall be identified and considered throughout the resource management planning process (see §§ 1610.4-1 through 1610.4-9).

(a) The inventory data shall be analyzed to determine whether there are areas containing resources, values, systems or processes or hazards eligible for further consideration for designation as an ACEC. In order to be a potential ACEC, both of the following criteria shall be met:

(1) *Relevance.* There shall be present a significant historic, cultural, or scenic value; a fish or wildlife resource or

§ 1610.8

other natural system or process; or natural hazard.

(2) *Importance.* The above described value, resource, system, process, or hazard shall have substantial significance and values. This generally requires qualities of more than local significance and special worth, consequence, meaning, distinctiveness, or cause for concern. A natural hazard can be important if it is a significant threat to human life or property.

(b) The State Director, upon approval of a draft resource management plan, plan revision, or plan amendment involving ACECs, shall publish a notice in the FEDERAL REGISTER listing each ACEC proposed and specifying the resource use limitations, if any, which would occur if it were formally designated. The notice shall provide a 60-day period for public comment on the proposed ACEC designation. The approval of a resource management plan, plan revision, or plan amendment constitutes formal designation of any ACEC involved. The approved plan shall include the general management practices and uses, including mitigating measures, identified to protect designated ACEC.

§ 1610.8 Transition period.

(a) Until superseded by resource management plans, management framework plans may be the basis for considering proposed actions as follows:

(1) The management framework plan shall be in compliance with the principle of multiple use and sustained yield and shall have been developed with public participation and governmental coordination, but not necessarily precisely as prescribed in §§ 1610.2 and 1610.3 of this title.

(2) No sooner than 30 days after the Environmental Protection Agency publishes a notice of the filing of a final court-ordered environmental impact statement—which is based on a management framework plan—proposed actions may be initiated without any further analysis or processes included in this subpart.

(3) For proposed actions other than those described in paragraph (a)(2) of this section, determination shall be made by the Field Manager whether the proposed action is in conformance

43 CFR Ch. II (10–1–08 Edition)

with the management framework plan. Such determination shall be in writing and shall explain the reasons for the determination.

(i) If the proposed action is in conformance, it may be further considered for decision under procedures applicable to that type of action, including requirements of regulations for implementing the procedural provisions of the National Environmental Policy Act in 40 CFR parts 1500–1508.

(ii) If the proposed action is not in conformance with the management framework plan, and if the proposed action warrants further favorable consideration before a resource management plan is scheduled for preparation, such consideration shall be through a management framework plan amendment using the provisions of § 1610.5–5 of this title.

(b)(1) If an action is proposed where public lands are not covered by a management framework plan or a resource management plan, an environmental assessment and an environmental impact statement, if necessary, plus any other data and analysis necessary to make an informed decision, shall be used to assess the impacts of the proposal and to provide a basis for a decision on the proposal.

(2) A land disposal action may be considered before a resource management plan is scheduled for preparation, through a planning analysis, using the process described in § 1610.5–5 of this title for amending a plan.
